

Review Template cs7670

Cristina Nita-Rotaru

Use the following template for the reviews you will need to submit for the class. Please use latex. Submission is through Gradescope available from Canvas class page.

1. Summary: Provide a 3-4 sentences describing what the paper is about:
 - What is the context
 - What is the problem being solved
 - What is the solution
 - How is the solution demonstrated (proofs, experiments)
2. Strengths and weaknesses: Describe 3-4 strengths and 3-4 weaknesses.
 - Keep this as a short list, you will develop them later in detailed comments.
 - Make the items meaningful and particular to the paper, no generic comments (i.e. presentation is not good).
3. Detailed comments: Develop on the strength and weaknesses listed above and any other comments you have.
 - Identify limitations
 - Look carefully at assumptions and execution.
4. Questions: In a conference review these questions are typically addressed to the authors. For the purpose of the class these questions will be for your colleagues to facilitate the discussions in the class. Examples include:
 - Things that are not clear
 - Things you did not understand
 - Comparison with related work
